

Congratulations to our next two partner organisations to be officially Certified by Peek Vision! 🙌 [Vision Action](#) in Ghana, and [AIC Health Ministries](#) in Meru County, Kenya, have both successfully completed their Certification to independently train Peek software users. In Kenya, AIC Health Ministries is using Peek in Meru County as part of the multi-county Vision Impact Project, led by [CBM Christian Blind Mission](#) and the [Ministry of Health, Kenya](#).

[Amos Mutunga \(CPSP-K\)](#), Project Officer at AIC Health Ministries says: “I am honoured to receive the Software User Training Certification from Peek Vision. As a Project Officer implementing the Vision Impact Program aiming to prevent avoidable blindness through the use of Peek technology, this recognition fuels my enthusiasm for our goal to reduce the prevalence of eye infections and to improve eye health in general. I eagerly anticipate our continued collaboration to ensure that people can access eye services through the use of the technology.” Peek Certification is designed to enable partners to scale up programme activities more quickly and efficiently.
